From: Lesmond lesm...@verizon.net So I guess it's clear that I'm the only one who thinks the name Apple is pretty, huh? Compared to the hideous abuse re: names some parents load their kids up with, Apple is fairly sane. I'd never name a kid Apple, though. That's Just Wrong. Granny Smith never minded. She was sort of crabby about it at first, but she mellowed. Eh, two or three glasses of Wine, and Granny's a Sap. How do you know? Have you been watching her like a northern spy?

When I heard what Paltrow had done, I wondered if she'd read the same story. Who knows, maybe she just thought Fiona's last name was cool. What kind of computer does Paltrow use? Maybe this one?

Posted by Joe Shimkus - 2008/05/10 06:25

Maybe this one? <http://www.ovulation-calculator.com/menstrual-cycle.htm>. A woman's fertile period during her menstrual cycle, on average, lasts about nine days: seven days before ovulation (the release of the egg), the day of ovulation, and the day after ovulation. So a woman is fertile before the egg pops out? Neat trick.

Everyone said that about Tiffany too. I still dislike the name Tiffany. You might just as well name your daughter Target. That is pronounced tar ZHAY Sean

Didn't the character Buckwheat have a contemporary (if not in the same movie short serials, then in a similar series) named Farina? Allen 'Farina' Hoskins was Billie 'Buckwheat' Thomas' predecessor as the black kid in the Our Gang comedies.
